# Learning Management System (LMS)

This B2B Learning Management System (LMS) is designed for small-scale educational institutions, freelance tutors, and language schools. The platform allows users to customize features such as adding recorded courses, conducting live classes, offering exam preparation sections, learning modules, puzzles, and providing students with detailed analytics and personalized dashboards.

HOMYFYD

# Property buying platform in Bangalore

This property management platform, based in Bangalore, allows customers to log in, search for properties based on their interests and filters, and schedule visits. The client also has a dynamic admin panel to add and manage properties, oversee user activity, track bookings, and more.

# Doctor booking platform

This doctor booking app, developed for the KLEA group of hospitals in Bangalore, allows users to log in, select preferred hospitals, and book appointments with available doctors. It also features a dynamic admin panel for the client to manage doctors, patient bookings, and other functions.

Demo video

# 1x1 Student Tutor platform

This is an edtech platform where students can log in to find tutors. It operates on a 1-on-1 model, connecting each student with a dedicated tutor for personalized learning.

# Edutech - Institute website

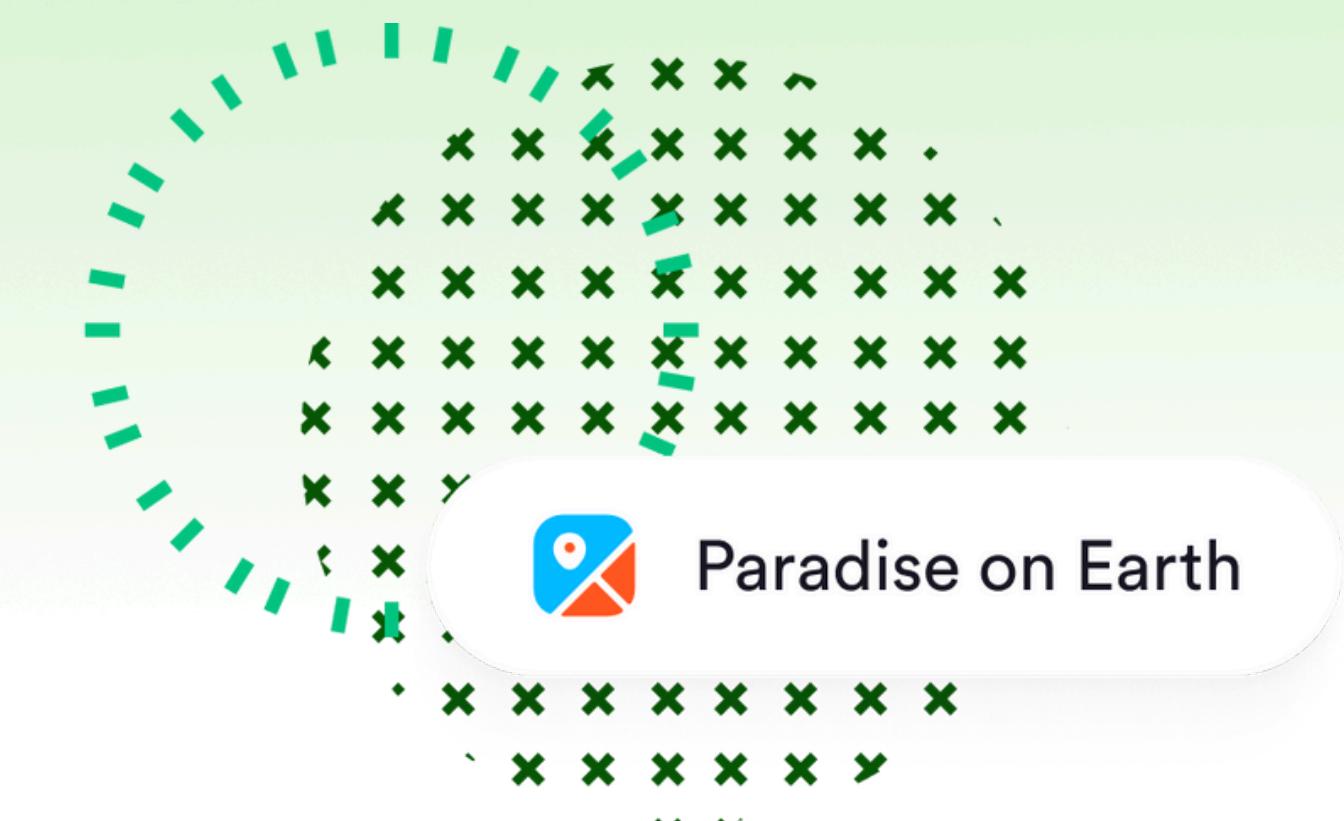

This website was developed for Agni, a Kerala-based language institute, to showcase their services. Users can explore all the courses offered, categorized by language. It also includes an admin panel for the management to add or remove courses, manage user inquiries, and more.

# Nilgiri based tourism company website

This website was created for Condor's Trove, a company that specializes in providing comprehensive tourism services exclusively for the Nilgiris. It highlights their offerings, including unique accommodations, packages, and other services.

# College website

This website was developed for Presidency College, Bangalore, as a secondary website to highlight some of their popular courses. Students can explore detailed information about these featured courses and more.

# E-Commerce website

This e-commerce website is designed to offer exclusive, authentic Nilgiri products, sourced directly from local manufacturers and farmers.
